---

### Career Objective:

Aiming to associate with a progressive company that will provide me a platform to upgrade my knowledge, skills, personality.

### Experience:

- 6 month experience as a trainee engineer at codentech, building a website for school using laravel framework. I designed an email template for notification and implement job functionality to send email using queue. Also i designed dashboard UI for students, teachers and principal role.
- Currently working as full stack developer at codentech, working on two different projects.

In NodeJs project, we are developing a product by using Google Maps API where user can able to drop a marker at any place on the way and we are showing how danger is that place by using cluster of markers so user can change route as per cluster color. And simultaneously, I am working on a laravel project where we are developing a project for a family member, Where we are showing family tree between family members and relatives.
